

WHAT IS CLAIMED IS:

1. An emergency switch comprising:
 - a base;
 - an indicator pin of a length and fastened at a bottom
 - 5 end with said base;
 - at least one electrical circuit switch mounted on said
 - base;
 - an activation body provided with at least one
 - activation projection and a torsion spring whereby said
 - 10 activation body is movably mounted on said indicator pin in
 - such a way that said activation projection is aligned with said
 - electrical circuit switch; and
 - a trigger button provided with a through hole and
 - fastened with a top end of said activation body in such a manner
 - 15 that said through hole is in alignment with said indicator pin,
 - and that a top end of said indicator pin is received in said
 - through hole of said trigger button whereby said top end of said
 - indicator pin is extended out of said through hole of said trigger
 - button at such time when said trigger button is exerted on by an
 - 20 external force so as to cause said activation projection of said
 - activation body to turn off said electrical circuit switch.
2. The emergency switch as defined in claim 1, wherein
- said top end of said indicator pin is different in color from said
- trigger button.
- 25 3. The emergency switch as defined in claim 1 further

comprising a housing which is mounted on said base to shield said indicator pin, said electrical circuit switch, and said activation body.
